## Section 5

# Periodic review of constituents

---

## 5. Periodic review of constituents

### 5.1 Review dates

- 5.1.1 The constituents of the China share class indices and China composite indices are reviewed in line with the FTSE Global All Cap Index Series.
- 5.1.2 All the relevant changes arising from the review of the FTSE Global All Cap Index Series will be applied to the China share class indices and China composite indices.

### 5.2 Capping

- 5.2.1 On a quarterly basis, the companies of the China share class indices (see Appendix A) are capped at 10%.
- 5.2.2 The calculation of the constituent capping factors (c) will be based on prices at close on the second Friday of the review month using shares in issue and investability weights as designated to take effect after close on the third Friday of the review month (i.e. taking effect on the review effective date).
- 5.2.3 The calculation will take into account any corporate actions/events that take effect after close on the second Friday of the review month up to and including the review effective date if they have been announced and confirmed by the second Friday of the review month.
- 5.2.4 Corporate actions/events announced after the second Friday of the review month that become effective up and including the review effective date will not result in any further adjustment.

### 5.3 Index review

- 5.3.1 At review, all constituent changes to the indices in the China share class indices and China composite indices will be in line with the constituent changes of the FTSE Global All Cap Index Series.

## Section 6

# Corporate actions and events

## 6. Changes to constituent companies

6.1 All corporate actions including new issues, additions outside of reviews, deletions outside of reviews, mergers, splits, suspensions, relisting and constituent weight changes to the indices in the FTSE China Index Series will be applied in the same consistent manner as in the FTSE Global Equity Index Series. For further information, please refer to the FTSE Global Equity Index Series Ground Rules.

### 6.2 Corporate actions and events

Full details of changes to constituent companies due to corporate actions and events can be accessed in the Corporate Actions and Events Guide using the following link:

[Corporate Actions and Events Guide.pdf](#)

A corporate action is an action on shareholders with a prescribed ex-date. The share price will be subject to an adjustment on the ex-date. The index will be adjusted in line with the ex-date.

These include the following:

- capital repayments;
- rights issues/entitlement offers;
- stock conversion;
- splits (sub-division)/reverse splits (consolidation); and
- scrip issues (capitalisation or bonus issue).

A corporate event is a reaction to company news (event) that may impact the index depending on the index rules. For example, a company announces a strategic shareholder is offering to sell their shares (secondary share offer) – this could result in a free float weighting change in the index. Where an index adjustment is required, FTSE will provide notice advising of the timing of the change.

### 6.3 Investability weightings

6.3.1 Changes to free float for constituent securities are covered in the Corporate Actions and Events Guide.

### 6.4 Capping of fast entrants

6.4.1 New equity securities (IPOs) that pass the FTSE Global Equity Index Series Fast Entry Level will also be eligible for inclusion in the China share class and China composite indices. For capped versions of the China share class indices, where a new security's investable market capitalisation at the close of business on the first day of trading causes their index weight to be greater than 10%, the index will be capped. The relevant capped China Share Class Index will be capped using prices adjusted for corporate actions as at the close of business on the first day of trading based on the constituents, shares in issue and free float after the close of business on the fifth day of trading.
